

Toroidal Tape Winder Type AirJet Complete with core holder jig and foot pedal.

Special designed to insulate small core on a very economically low-cost way.
The AirJet is a rapid way to tape small Toroidal cores,
Give wound repeatability and quality
on every production run

Core OD size:	max. Ø80mm,
Core ID size:	min. Ø8mm,
Core height:	max. 40mm
Tape non adhesive:	6, 8, 10, 13, 17mm
Air Pressure:	6 Bar
Foot pedal:	Yes
Net weight:	1,5 kg

Hold tape over the top of Toroid.

With the help of AirJet the tape will be pushed through the core and once again make the tape to come over the top of Toroid to produce the wound tape turns.
